## **INSPIRATION SOFTWARE**

### **Site License**

**Description:** A Software program that helps you think and learn visually Inspiration allows you to create a picture of your ideas or concepts in the form of a diagram. It also provides an integrated outlining environment to help you develop your ideas into organized written documents. Inspiration's combination of visual and linear thinking deepens understanding of concepts, increases memory retention, develops organizational skills and taps creativity.

When you work with visual representation of ideas, you easily see how one idea relates to the others. Learning and thinking become active than passive. You discover where your deepest knowledge lies, and where the gaps in your understanding are. When you create a visual map of ideas, you can recall the details better than if you had read a paragraph. That's because you can see it in your mind.

If you have an idea that you want to expand, whether it's an idea for a written document or to map out a plan, Inspiration can help you organize your thoughts and save you time. use the visual diagramming part of the program to work with your ideas to arrange them and group them—in other words, to clarify your thinking.

When you need a different kind of structure, you can use the outlining part of the program to organize your ideas in outline form. Inspiration's outlining environment is perfect for creating structure for written documents, speeches and plans.
