**Inspiration**  
*(35 Copies Networked Windows)*

**CD-ROM 153.42 IN7**

**Description:** A software program that helps the students to think and learn visually. Inspiration allows the student to create with tools a picture of their ideas or concepts in the form of a diagram. It also provides an integrated outlining environment to help students develop ideas into organized written documents. Inspiration's combination of visual and linear thinking deepens understanding of concepts, increases memory retention, develops organizational skills, and taps creativity.

When students work with visual representations of ideas, they easily see how one idea relates to the others. Learning and thinking become active rather than passive. The students discover where their deepest knowledge lies, and where the gaps in their understanding are. When the students create a visual map of ideas, they can recall the details better than if they had read a paragraph. That's because the student can see it in his or her mind.

Inspiration's outlining environment is perfect for creating structure for written documents, speeches and plans.
