

## Certified Phlebotomy Technician (CPT)

### **Accelerated Program Overview:**

The Certified Phlebotomy Technician (CPT) accelerated program provides the experienced student with additional skills and training in order to succeed in the healthcare field as a phlebotomist. This course contains lecture, discussion, and practical instruction. The student must demonstrate proficient phlebotomy skills and knowledge equivalent to the Phlebotomy program but in a shorter timeframe. This class is intended only for students with prior medical training, related education, or clinical experience. Complete the eligibility form in this packet to see if you are eligible or email [mbrandon@prcc.edu](mailto:mbrandon@prcc.edu) with questions related to eligibility. If you are not eligible or would appreciate more in-depth coverage of the field, please look into our Phlebotomy program. The program will cover safety standards, a variety of blood collection techniques, and specimen handling and processing procedures.

**Phlebotomy (CPT) technician exam candidates:** experience must include performing a minimum of 30 successful venipunctures and 10 successful capillary sticks. These venipuncture and capillary sticks must be performed on live individuals. Candidates are prohibited from using mannequins to meet this requirement. Students who have successfully completed the program and the minimum number of procedures required will take the Certified Phlebotomy Technician (CPT) test onsite through the National Healthcareer Association (NHA).

### **COURSE GOALS:**

- Performs phlebotomy procedures and tasks in an accurate, timely and professional manner.
- Demonstrates communication skills necessary for working in the health care setting.
- Demonstrates safe and skillful use of phlebotomy equipment.
- Demonstrates basic understanding of quality assurance.
- Demonstrates critical thinking skills and ability to solve problems.
- Emphasizes professionalism, including initiative, positive interpersonal skills, teamwork, respect, and caring.

**Classes will meet Friday from 1pm-5pm and  
Saturday from 8am-4pm.  
Course begins Friday, June 3, 2022 and ends  
Saturday, June 4, 2022.**

**Course Fee: \$250**

## Summer 2022 CPT Calendar

<b>Dates:</b>	<b>Events:</b>
March 7, 2022- May 27, 2022 (or until seats are full)	Completed Applications accepted
May 30, 2022	Tuition balances are due
June 3, 2022	Class begins
June 4, 2022	Program completion
June 10, 2022 (or other agreed upon date)	Phlebotomy technician (CPT) exam

### **For Program Consideration:**

There is a **Program Prerequisites** list to follow to insure you have a complete packet. All forms should be carefully completed and include all necessary documents.

**Application packets are accepted on Monday through Friday from 8:30 am – 3:00 pm at The Lowery Woodall Center, 906 Sullivan Drive, Hattiesburg.**

### **Pre-Requisite Checklist:**

This packet lists all steps involved in making a complete application for the CPT program.

All pre-requisite costs are to be covered by the student. **PLEASE READ ALL INFORMATION!**

Read: Information on a Career in Certified Phlebotomy Technician ( <b>Page 3</b> )	
Read: Workforce Education Training & Attendance Policies ( <b>Page 4</b> ) Sign: Policy Compliance Form ( <b>Page 5</b> )	
Complete: Hep B Consent or Declination Form ( <b>Page 6</b> )	
Submit: Copy of one of the following: High School Transcript or Diploma/GED/High School Equivalency	
Complete: Program Application ( <b>Page 7</b> )	
Sign: Program Consent and Complete Healthcare Verification Form ( <b>Page 8&amp;9</b> )	

## Certified Phlebotomy Technician (CPT)

### Career Information:

Phlebotomy technicians are critical team members in hospitals, diagnostic laboratories and blood donor centers. As new types of tests are developed and laboratory tech positions grow, it's an especially exciting time to begin a career in this thriving field. Some tasks phlebotomy technicians may perform include:

- \* Drawing blood from patients and blood donors
- \* Evaluating patients' ability to withstand the procedure and helping them feel comfortable
- \* Explaining blood-drawing procedure to patients and answering questions
- \* Performing basic point-of-care testing, such as reading blood glucose levels
- \* Preparing blood, urine, and other specimens for testing
- \* Maintaining medical equipment such as needles, test tubes, and blood vials

### Why earn a phlebotomy certification?

According to the Bureau of Labor and Statistics (BLS), employment of phlebotomy technicians is expected to grow 22 percent from 2020 to 2030, much faster than the average for all occupations, which are expected to grow around 8 percent.

About 19,500 openings for phlebotomists are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace workers who transfer to different occupations or exit the labor force, such as to retire.

Having a nationally accredited certification, like the CCMA, can help you stand out. Certification may also be required or preferred for certain job opportunities in the profession

**86% of institutions** encourage/require certification.

**79% of employers** report that their phlebotomy techs are certified.

## **Workforce Education Training Policies**

The Workforce Education Division will operate its training/courses in accordance with the Pearl River Community College Student Handbook\*.

The following items are of particular concern in Workforce Training Courses:

1. There will be no cell phone use in the classroom, lab or clinical areas.
2. Students must be properly dressed according to class requirements.
3. Each student will obtain and bring to class all required training tools and/or equipment.
4. Each student will obtain and bring to class their own textbooks or laboratory manuals.
5. Students will inform the instructor should an emergency arise in which they will not be able to attend class or need to leave the training area.
6. Smoking and other tobacco use is prohibited on all PRCC properties. This is a tobacco free campus.
7. Medical scrubs of any color (preferably maroon) are to be worn to all classroom activities.

### **Class Attendance**

The goal of Pearl River Community College is to prepare students for the workforce by training job and employability skills. With this goal in mind the following attendance policy has been adopted by PRCC Workforce Education Division.

Regular and punctual attendance is required of all students enrolled in classes. Due to the interactive learning methods and limited opportunity to obtain lab/skill information, student attendance is mandatory for this course. Therefore, students are expected to attend each day and any absence forfeits enrollment in the course. Students with an unavoidable absence must e-mail or leave a voice mail for the instructor as soon as possible regarding their absence.

\*The PRCC Student Handbook may be downloaded at <http://www.prcc.edu/current-students/student-handbook>

## Policy Compliance Form

I, \_\_\_\_\_, have read and understand Workforce Education training and attendance policies.

I certify that all the information submitted in this application is accurate and true to the best of my knowledge.

I understand that in the event I do not complete the training for any reason or am dismissed from this program, no refunds will be allowed.

DATE: \_\_\_\_\_

## Hepatitis B Vaccine Information Sheet

The U.S. Occupational Safety and Health Administrator (OSHA) issued a new Blood-borne Pathogens Standard in December 1991. The rule applies to all employers who have workers that may come in contact with blood or other body fluids during the performance of their job, putting them at risk of contracting highly contagious viral infections. Health Science student, because of the nature of their occupational training, may also be at risk of contracting these same blood-borne infections.

HBV is a potentially life-threatening virus. The CDC (Centers for Disease Control) estimates there to be approximately 280,000 HBV infections each year in the United States, about 8,700 of these includes health care workers.

The observation of Universal Precaution technique and the utilization of protective clothing and equipment may prevent exposure to potentially infectious materials. However, the best defense against Hepatitis B Virus is vaccination. Although it is not a medical requirement, it is strongly recommended that you consider being vaccinated.

If anytime you are exposed to a blood-borne pathogen, a report of the incident **MUST** be filed with the clinical affiliate.

### PLEASE COMPLETE:

I understand that due to occupational exposure to blood or other potentially infectious materials, I may be at risk of contacting the HBV infection.

I have been informed of the importance and benefits of the HBV vaccination and it has been strongly recommended that I be vaccinated. Please indicate your status/decision regarding hepatitis B vaccination:

1. Begun/Completed Vaccination Series:

Vaccination Dates: 1) \_\_\_\_\_ 2) \_\_\_\_\_ 3) \_\_\_\_\_

2. My signature indicates that I have decided not to be vaccinated at this time.

If you have a disability that qualifies under the Americans with Disabilities Act and you require special assistance or accommodations, you should contact the designated coordinator for your campus for information on appropriate guidelines and procedures: For all campuses/centers contact Eddie Sandifer at 601-403-1215 or esandifer@prcc.edu; or for Poplarville Campus, Tonia Moody Seal at 601-403-1060 or tmoody@prcc.edu; Forrest County Center, Michelle Wilson-Stokes at 601-554-5500 or mwilson@prcc.edu; Hancock Center, Raymunda Barnes at 228-252-7000 or rbarnes@prcc.edu. eLearning – Online students who require special assistance, accommodations, and/or need for alternate format should contact Eddie Sandifer or Tonia Moody Seal. For Title IV services, contact Maghan James, Assistant Vice President of Student Services/Title IX Coordinator, 601-403-1132 or mjames@prcc.edu.

**PRCC Health Science Programs Communicable Disease Statement and Waiver of Liability**

**Health Science Students Performing Health Care Work**

General Information:

For effective phlebotomy training, it is necessary for students in the Phlebotomy Program to voluntarily agree to have blood drawn by other students in class. During this course you will be participating in laboratory activities in which learning by students requires the use of human subjects as part of the training. As a part of these learning activities you will be asked to perform specific skills as well as be the subject of specific skills practiced by students. These learning activities will be conducted under the supervision of the course instructor.

Benefits:

The activities listed have been selected because they are skills essential to the learning process and the faculty believe that realistic practice is essential for optimum learning.

**Bloodborne Pathogen Exposure**

In health science and the phlebotomy courses, the possibility of an anticipated occupational exposure to blood or other potentially infectious materials exists. It is important that you be aware that blood and other body fluids have been implicated in the transmission of certain pathogens, particularly Hepatitis B Virus (HBV) and Human Immunodeficiency Virus (HIV), the virus responsible for Acquired Immune Deficiency Syndrome (AIDS). In order to minimize risk of exposure to bloodborne pathogens, the student must agree to follow Standard Precautions guidelines as well as comply with regulations outlined in the OSHA Bloodborne Pathogen Standard.

**Risks/Discomforts**

Course requirements for completion of the program require students to perform capillary punctures and/or venipunctures on fellow students during laboratory sessions while under the supervision of the instructor. The instructional programs seek to minimize the risks (e.g. hematoma, fainting, bruising) associated with blood collection. Specific risks are listed below.

<b>Learning Activity</b>	<b>Specific Benefit</b>	<b>Risks/Discomfort</b>
Venipuncture using both evacuated tube system (ETS) and syringe system	Student gains experience needed prior to performing procedures on actual patients	Possibility of hematoma or bruising; slight, temporary pain with procedure; slight risk of temporary nerve inflammation
Finger puncture	Same as above	Slight, temporary pain upon puncture; minimal possibility of infection (provided area is kept clean)

Participation in the program includes informed consent to have blood collected. In addition, your signature indicates you will agree to hold the College or any affiliated clinical site harmless for complications arising from the blood collection procedure to include accidental needle stick injury. I HEREBY CONSENT to perform and allow fellow classmates to perform capillary puncture and/or venipuncture on me during my attendance at PRCC in the Phlebotomy Program.

## Health Care Related Experience Verification Form

### Prerequisite for Program Participation:

The participants must be qualified health care professionals based on criteria set forth by the Certified Phlebotomy Technician Program. The CPT program is only designed for those persons who possess competency in the healthcare field, and have a prior background in healthcare by way of experience, schooling, and/or job training.

Qualifying healthcare care experiences will be evaluated on a case-by-case basis.

(Note: Formal and written patient care verification in an ambulatory care, medical office, or clinic environment may be required.)

### To be completed by prospective student:

Student Name: \_\_\_\_\_

Date of Birth: \_\_\_\_\_ Telephone number: \_\_\_\_\_

Facility Name: \_\_\_\_\_ Facility Phone Number: \_\_\_\_\_

Facility Address \_\_\_\_\_

Dates of Clinical Experience \_\_\_\_\_ Total Hours \_\_\_\_\_

Description of experience and/or duties and responsibilities \_\_\_\_\_
