SOFTWARE DESCRIPTIONS AND LESSONS

Inspiration Networked Windows

Description: A software program that helps the students to think and learn visually. Inspiration allow the student to Create with tools a picture of their ideas or concepts in the form of a diagram. It also provides an integrated outlining environment to help students develop ideas into organized written documents. Inspiration's combination of visual and linear thinking Deepens understanding of concepts, increases memory Retention, develops organizational skills and taps creativity.

When students work with visual representations of ideas, they easily see how one idea relates to the others. Learning and thinking become active rather than passive. The students discover where their deepest knowledge lies, and where the gaps in their understanding are. When the students create a visual map of ideas, they can recall the details better than if they had read a paragraph. That's because the student can see it in his or her mind.

Inspiration's outlining environment is perfect for creating structure for written documents, speeches and plans.

Examples of Lessons:

Concept Maps

Idea Maps

Webs

Storyboards

Language Arts Character

Language Arts Comparison
Language Arts Literary Web
SOFTWARE DESCRIPTIONS AND LESSONS

**Figurative Language
Question Designer under English**

Description: This program provides and reinforces the different types of figurative language through various literary readings.

Prose: The Brothers Grimm

SOFTWARE DESCRIPTIONS AND LESSONS

SkillsBank V

Windows Networked 50 users

- Description:** This product is a comprehensive resource for diagnosing and Remediating students' basic skills. Now with over 600 Activities, *SkillsBank V* covers core concepts in Reading, Language Arts and Writing. Thinking Skills lessons are woven throughout the product. This makes *SkillsBank V* a powerful resource for teaching students to apply concepts, think critically, and discover creative solutions to real-life problems. A powerful tool for monitoring the computer activities of a class accompanies *SkillsBank V*. Achievement Technologies' Assignment and Tracking System provides
- Several important features:
- *Manages multiple educational products simultaneously, giving teachers quicker and easier access to *SkillsBank V*
 - *Tests students' skills, providing both pretests and posttests to make initial assessments and gauge student progress
 - *Makes assignments, allowing teachers to select from a standard set of assignments or tailor assignments themselves
 - *Monitors student scores and completion of activities
 - *Produces reports for individual students and entire classes
 - *Provides online documentation, as well as printable activity sheets which extend the computer lessons to classroom or homework activities.

The Assignment and Tracking System has separate components for teachers and students.
